Wirescope 350 Network Analyser

NA25056

Features:

- Certifies compliance of Lan cabling to Cat 6 Class E standards
- Accurate beyond TIA Level III requirements
- Colour touchscreen with minimal training required
- Professional quality graphical test results
- Tests fibre optic cabling via optional Smart Probes

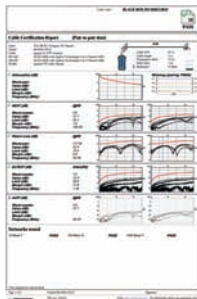

Category 6 ready

The Wirescope 350 is a level III high performance cable tester with the capability of testing up to 350 Mhz, exceeding the requirements for the newly ratified Category 6.

The tester, which is recommended for certifying all Sterling 6 systems offers a combination of measurement precision, advanced features and affordability. The tests can be viewed as coloured graphical data or downloaded to a PC via serial or a USB link.

WireScope 350 Network Analyser

Presentation

As the complexity of infrastructure testing becomes more challenging, it is essential that test results can be viewed clearly and precisely. The WireScope 350 has software that include professionally designed report layouts that facilitate full colour analysis of cabling quality and Headroom limits.

Agilent Technologies

Lan Test Pro

TE25048

The Lan Test Pro is a small hand-held cable tester that allows professionals to check the integrity of the Twisted Pair Cabling. In one step it will test the cabling for opens, shorts, crossed, reversed and split pairs. The Lan Test Pro includes a remote unit for testing patch cables.

**Lan Probe Tester**

TE25050

The Lan Probe Tester is an inductive probe used for finding cables hidden in floors, ceilings and walls and incorporates adjustable tone volume control for different work environments.

- Supplied with probe kit

BI Communications Quintest

QUINTEST

- Rugged Structured Cabling Tester
- Compact design, weights less than 175g
- Tests and verifies 2,3, and 4 pair Voice and Data wiring
- Sequencing LED's indicate cabling faults at both ends

- Units snap together with magnetic clasp for protection
- Auto power off and low battery indication

Lan ID Tester

TE25051

The Lan ID Tester is a diagnostic tool for engineers working with local area networks, at the push of a button you can confirm the network performance of your installed infrastructure or Lan device. The identified topologies capabilities include 100 Base T full and half Duplex and 10 Base T full and half Duplex.

Test Telephone 800 (Digital)

TE25055

- Digital and loud speaker
- DTMF mode dialling
- Pulse (loop disconnect) mode dialling & TBR
- Auto power down
- Hands free loudspeaker
- Hands free microphone
- DATASAFE feature
- Custom speaker volume control
- Features as 295A test telephone (below)

**Test Telephone 295A**

TE25056

- Standard butt telephone
- DTMF/pulse dialling
- Polarity LED test
- Talk/monitor switch
- High impedance monitor mode
- 10 speed number dial memory
- Flash (DIS) button
- Audible ring indication
- Mute button
- Redial button
