Adaptors

ADSL Adaptor HS1052

BT UK Double Adaptor 302050

Quante ID 3000

With its compact dimensions and its high density, the MDF technology, "Quante ID 3000" is the basic element of the ID 3000 product family. The modular design of the system allows configurations of different ratios of line-and exchange side with individual 8 or 10 pair modules as well as the compilation of blocks in any size and order.

Disconnection block ID 3000, 104 pair, 128 pair and 512 pair

The Quante ID 3000 system permits installation on to existing Main Distribution Frames (horizontal/vertical) or a sheer vertical installation on Quante ID 3000 frames or profiles. The system is intended for a wall-mounted or freestanding frames.

Optimised on the binary built up cables (8, 16, 32 pair etc) The Quante ID 3000 easily allows the application in MDF technologies at the Central Offices, as well as Ethernet and Token Ring, where the requirements according to IEEE 802.3 and 802.5 are fulfilled. The main advantages of the consistent modular structure are short cross-connection times due to short cross-connection path and mixed ratio of internal / external lines of 8 and 10 pair modules. Single modules can be easily changed later without difficulties.

Colour: RAL 7032

Mounting rail material: stainless steel, 1.5 mm

Each block is supplied with: 16 disconnection modules 8 pair (ID 3000)
1 labelling frame, 1 cable cover, 1 set of labelling strip, 1 covering strip, 1 mounting material(1 backmount frame)
