

Kedington Appoints Pre and Post Sales Technical Support Engineer

Kedington, Ireland's leading provider of structured cabling and networking solutions, today announces the appointment of James Craig to the position of pre and post sales technical support engineer for Kedington's Solutions Division. He previously worked for two years as a network and telecoms engineer. He has played a leading role in the implementation of large projects such as the network infrastructure in Croke Park providing for, among other things, centrally managed WiFi, VoIP, television control and the ticket admittance system.

James will be responsible for the deployment and maintenance of Kedington's range of active network and telecommunications products with a particular emphasis on secure converged wired and wireless solutions.

James joins from Diacom Computer Telephony, where he was a Network and Telecoms Engineer for two years. Prior to that, he studied for a B.Eng in Digital Media Engineering in Dublin City University for four years.

About Kedington

Kedington was founded in 1989 and was purchased by Denis O'Brien's Esat in 1999. In March 2003 an MBO, lead by Matt Porter and Colm Lyons was concluded taking the company back into private ownership. Matt and Colm managed to secure the entire Republic of Ireland operation, with offices in Dublin, Cork and Limerick, and kept the original management team together. Its customers have enjoyed a seamless change-over and continue to benefit from a huge wealth of expertise that still resides within the group.
